

Jennifer Xie

SENIOR GAME UI/UX DESIGNER

PORTFOLIO: xjenniferxie.github.io | EMAIL: xjenniferxie@gmail.com

I'm a Game UI/UX Designer with a background in art, design, and software engineering. My exceptional communication skills, detail-oriented design process, and passion for video games enable me to work seamlessly across UI Art, UX Design, and UI Implementation.

WORK EXPERIENCE

JAM CITY

Senior UI/UX Designer

Apr 2025 - Present

Established the technical UI foundation for an unreleased game built in Unity.

- Developed UI conventions for project structure, asset organization, style management, and naming schema.
- Collaborated with Engineering to design custom UI tooling needed for the UI development pipeline.
- Implemented UI for prototypes of core game functionality.

UI/UX Designer

Jan 2023 - Apr 2025

Led UI/UX design from concept to launch for a large collection of features on the live-service, mobile RPG *Harry Potter: Hogwarts Mystery*.

- Designed mockups of the feature's layout and UX flow, and iterated based on stakeholder feedback.
- Developed the UI's visual design and created the final UI art assets.
- Implemented the feature's UI within our internal game engine.
- Collaborated with cross-discipline teams, including Game Design, Engineering, Product, Art, and QA, to achieve a polished and cohesive player experience.

KEY FEATURES

- **Hogwarts Diary:** New story collection event, in which players collect gacha packs and open them to complete puzzle pictures, earn rewards, and unlock story content.
- **Spellbinding Sequences:** New sequential ladder sale event that boosted in-app purchases.
- **Hogwarts Harvest:** New plant care system, where players can purchase, grow, and harvest magical plants.
- **Creature Needs V2:** Delivered quality of life improvements across our magical creature system's UI.

TWITTER

UI/UX Designer & Software Engineer II - Compute Team

Jul 2020 - Aug 2022

Served as the UI/UX and front-end expert for a collection of web-based internal tools (React UIs + APIs).

- **Capacity Dashboard:** Led the UI/UX design process—brainstormed ideas, designed mockups, facilitated UX testing, and incorporated feedback from stakeholders.
- **Kubernetes Dashboard:** Designed and implemented UI/UX changes to improve customers' user experience.

Design & Software Engineering Intern - Open Source Team

May - Aug 2018, May - Aug 2019

- Designed the UI/UX and developed the front-end of the website opensource.twitter.com.
